SUHANI GOYAL
Python Developer | Django, REST APIs, Backend Systems | AI/ML
gsuhani433@gmail.com| +91-8989922802 | LinkedIn | GitHub | Twitter | Gwalior, 474002, India

SUMMARY

Software Developer with experience in Python, Django, REST APIs, MySQL, AWS and Data Structures. Developed data-driven web applications, including NLP-based text classification systems, authentication platforms, and web scraping solutions using BeautifulSoup. Skilled in database design, Git/GitHub, software testing and cloud fundamentals. Focused on building scalable backend systems and efficient real-world applications.

SKILLS

- **Programming**: Python, Java, PHP, Data Structures and Algorithms
- **Backend:** Django, Django REST Framework (Serializers), REST APIs, API Integration, Middleware
- **Web & Databases**: HTML5, CSS3, JavaScript, Bootstrap, MySQL, SQLite
- **Data & ML:** Pandas, NumPy, scikit-learn, NLP (spaCy, NLTK), TF-IDF, BeautifulSoup
- **Tools & Platforms:** Git/GitHub, AWS, Firebase, Postman, phpMyAdmin, Figma
- **Testing:** Unit Testing (pytest, unittest), Manual Testing, Quality Assurance (QA)

EXPERIENCE

Software Development Intern | e-Biz Technocrats Pvt. Ltd. | Jun 2025 – Jul 2025

- Redesigned landing pages using Figma, Bootstrap, JavaScript and PHP, improving conversion rates by 15%.
- Conducted functional testing and improved SEO performance, contributing to a ₹55 lakh client acquisition.
- Created digital awareness materials for NGO initiatives supporting Women Self-Help Groups (20+ beneficiaries).
- Collaborated in a 5–7 member development team to streamline workflows and ensure on-time project delivery.

Fake News Detection System | Academic Project | NLP & Machine Learning| Live Demo | GitHub Repo

- Automated web scraping from 10+ news sources, collecting and storing 300+ news articles in MySQL and SQLite databases.
- Implemented TF-IDF and Support Vector Classifier (SVC) to classify 300+ news records, achieving consistent prediction accuracy on test data.
- Developed REST APIs using Django REST Framework to handle real-time prediction requests and structured data processing.
- **Tech:** Python, Django, MySQL, SQLite, BeautifulSoup, scikit-learn, spaCy, NLTK

Personal Portfolio Management System | Academic Project | Django, CRUD, ORM | Live Demo | GitHub Repo

- Constructed a MySQL database schema, ensuring data integrity and scalability for the Django web app ; stores and manages 10+ project records.
- Developed secure authentication (signup/login/logout) and CRUD operations across multiple modules.
- Built a responsive dashboard using HTML5, CSS3 and Bootstrap integrated with Django ORM.
- **Tech:** Python, Django, MySQL, Bootstrap, Authentication, CRUD, ORM, Responsive Web Design.

CERTIFICATION ACTIVITIES

- **AWS Cloud Foundations Training Badge** : Acquired foundational skills in cloud computing, AWS services, and application deployment.
- Led a team in **MP Police Cybersecurity Hackathon 2025** and **Smart India Hackathon 2025,** coordinating tasks and delivering project solutions under tight deadlines.
- **Project Electricity Is Generated By Waste Material** shortlisted for **Anveshana 2024–25, representing the entire 2nd year**.

EDUCATION

- ITM University, Gwalior | Bachelor of Computer Applications (BCA H) | CGPA: 8.2 | Aug 2023 – April 2026
- Carmel Convent School, Gwalior | CBSE Class X & XII | X: 93.5%, XII: 92% | Apr 2020 – Mar 2023
